Supplementary Material 6A. Funnel plot showing the relationship between gallstone and the BTC risk.
Pseudo 95% confidence limits indicated as dotted line. Egger’s regression asymmetry test (BTC, $t=0.79$, $p=0.421$).
Supplementary Material 6B. Funnel plot showing the relationship between gallstone and the GBC risk.
Pseudo 95% confidence limits indicated as dotted line. Egger’s regression asymmetry test (GBC; t=1.98, p=0.068).
Supplementary Material 6C. Funnel plot showing the relationship between gallstone and the EBDC risk.
Pseudo 95% confidence limits indicated as dotted line. Egger’s regression asymmetry test (EBDC, t=0.41, p=0.688).
Supplementary Material 6D. Funnel plot showing the relationship between gallstone and the AOVC risk.

Pseudo 95% confidence limits indicated as dotted line. Egger’s regression asymmetry test (AOVC, t=1.13, p=0.340).
