

Supplementary materials

Supplementary Material 5. Relative risk of COVID-19 incidence per interquartile range increment of the standardized prevalence of diabetes

Index	Model 1		Model 2		Model 3	
	RR [†]	95% CI	RR [†]	95% CI	RR [†]	95% CI
Standardized prevalence of diabetes (%)	1.04	(1.00–1.08)	1.05	(1.00–1.10)*	1.09	(1.04–1.14)*

RR, relative risk; CI, confidence interval. **P*-value <0.05. RR, Model 1: crude model; model 2: adjusted for composite deprivation index; and model 3: model 2 + adjusted for the standardized prevalence of hypertension.
